**Re: Auris Medical Holding AG
Amendment No. 2 to Draft Registration Statement on Form F-1
Submitted June 6, 2014
CIK No. 0001601936**

Dear Mr. Meyer:

We have reviewed your amended draft registration statement and have the following comments. In some of our comments, we may ask you to provide us with information so we may better understand your disclosure.

Please respond to this letter by providing the requested information and either submitting an amended draft registration statement or publicly filing your registration statement on EDGAR. If you do not believe our comments apply to your facts and circumstances or do not believe an amendment is appropriate, please tell us why in your response.

After reviewing the information you provide in response to these comments and your amended draft registration statement or filed registration statement, we may have additional comments.

AM-101 Clinical Development, page 76

1. We note that your revised registration statement omits various tables and charts illustrating the results of your Phase 2 trials for AM-101 that were included in prior amendments to your draft registration statement. Please restore this information to your registration statement as such tables and charts provided important data about the results of these trials.
2. We note your disclosure that over two Phase 2 clinical trials, AM-101 showed a statistically significant improvement in the AAT and OM group of patients when compared against placebo. Please revise your disclosure to discuss whether the specific results of the TACTT1 trial with respect to subjective tinnitus loudness were independently statistically significant as compared to placebo.
