As previously disclosed, on October 11, 2019, Auris Medical Holding Ltd. (the “Company”) announced positive interim results from its Phase 1b trial with AM-201 in antipsychotic-induced weight gain and somnolence. The study demonstrated good safety and tolerability of AM-201 over the four-week treatment period and revealed relevant reductions in olanzapine-induced weight gain and daytime sleepiness. In female study participants, who overall showed more pronounced changes than male participants, a reduction in weight gain of 1.1 kg against placebo was observed at the highest tested dose of 20 mg three times per day (probability of effectiveness = 90%).

The study has proceeded to the next higher and final dose level of 30 mg to be tested on a cohort of 30 healthy volunteers. The Company anticipates a data read-out from the second cohort early in the second quarter of 2020.
